SYNOPSIS OF OUTLOOK...

From the GFS forecast out 2-5 May, it appears that heaviest rains in the forecast period may occur during those dates in Washington, including s
The NOAA 8-14 day outlook from 29th was not available. The CFSv2 outlook for May was showing above normal rainfall in Oregon
most or all of Oregon during May, but about normal for the southcentral counties, and modestly above normal rainfall
for Olympic Peninsula and the Washington coast, but near normal rain amounts from Seattle to Vancouver, WA
to Portland, OR.
