

Producer Collaboration Letter for Kraig Knutzen

I will participate in this project from inception to completion.
More specifically, I will:

- report weekly late blight intensity estimates (e.g. 1 field is ~10% infected)
- report weekly phenology updates (e.g. fields are at row-closure)
- host an AgWeatherNet weather station(s) if needed.

If and when late blight is detected in fields, I will guide David Wheeler to the field(s) for confirmation.
